

K-Love Radio Stations are a very important part of the Silicon Valley community. It is the only station in our area that offers family friendly programming. When K-Love is tuned in on our radio I am always assured that my child will not hear anything offensive or inappropriate. Not only does K-Love provide family friendly programming, but they are also available to answer their telephones regarding prayer requests or for people seeking counsel about a personal problem in their lives. In these times people often don't have someone they can reach out to in times of need and K-Love offers our community that service. It would be an extreme loss to our community to lose the resources that K-Love offers to an LPFM station that may not show such care and concern for the people living in Silicon Valley and for all of the citizens of the United States.
